NormShield VS Classical Solutions

Supply Chain Risk Management

	Speed	
Automated non-intrusive risk assessment		**Questionnaire based vendor risk assessment**
in seconds		**takes days** if not weeks

	Trust	
Track the risk score of suppliers continuously		**Labor intensive annual risk assessment**
Continuous & objective		**Annual & biased**

TRUST BUT VERIFY

Thank you Ronald Reagan

> No, we don't have any unpatched system
>
> Yes, we keep your data secure :)

Every Supplier

Challenge

What if you need to assess **1000** suppliers every quarter?

Hint: Not every supplier is equally important.

|	Cost	
With NormShield You can prioritize your vendors and optimize the cost		**Current solutions will be too expensive and point-in-time or not monitor most of the suppliers**
$136,000		**$766,000**

82% saving

WHY NORMSHIELD

NormShield provides full and continuous visibility to your entire supply chain and you can save TIME & MONEY.

THE SOLUTION:

NormShield enables enterprises to assess and monitor their own and their third-party vendors' external cyber risk posture by performing **non-intrusive** cyber risk assessments and converting the data into form of a **scorecard**.
