

BLACK KITE

WHERE INSIGHT TAKES FLIGHT™

WHO WE ARE

Our story began when our co-founder Candan Bolukbas realized his work trailblazing cybersecurity avenues for the government had the ability to help organizations worldwide.

Since 2016, Candan and the rest of our team has set out on a mission to build the most trustworthy cyber rating system in the world.

As we continue to redefine third-party cyber risk management, we aim to improve the health and safety of the entire planet's cyber ecosystem. With our global footprint, we'll rebuild risk professionals' confidence in putting security ratings at the center of third-party risk management.

WHAT WE DO

Black Kite is the only cyber risk ratings system built from a hacker's perspective. Unlike other security ratings services, we know a rating is just a rating without the full picture. We offer the entire view of your cyber risk posture from a **technical, financial and compliance** standpoint.

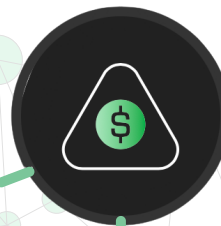

TECHNICAL CYBER RISK SCORES

Know which parties pose the highest threat to your organization through the industry's most comprehensive threat intelligence platform.

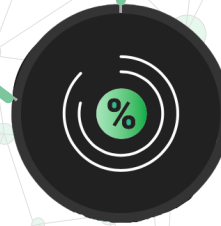

FINANCIAL RISK QUANTIFICATION

Calculate the probable financial impact to your organization in the case of a breach using the Open FAIR™ model.

QUESTIONNAIRE & COMPLIANCE CORRELATION

Measure the compliance level of any company by automatically cross-correlating cyber risk findings to industry standards and best practices.

WHY US?

Communicate risk throughout the organization with easy-to-understand letter grades calculated from 20 categories.

Trust your data that's sourced from commonly-used frameworks created by the MITRE corporation for scoring weaknesses consistently and transparently.

Measure risk in dollars and cents, using our Open FAIR™ model to estimate the financial loss in the case of a breach.

Scale your third-party risk program with the largest global footprint of data that provides immediate insight into your cyber ecosystem.

Get support from a team that's just as committed to your risk program as you are, which shows through our 5-star customer service rating from Gartner Peer Reviews.
