

IDENTIFYING CYBER RISK FOR TECHNOLOGY COMPANIES

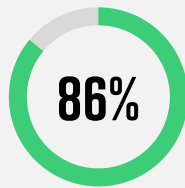

PREVENTING UNRECOGNIZED RISK IN DIGITAL SUPPLY CHAINS.

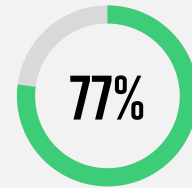

The increasing attack surface of digital supply chains has created a target-rich environment for cybercriminals. Because of this, a checklist-based monitoring approach no longer works. Staying vigilant and dynamic is the only option to successfully continuously monitor every vendor in your technology ecosystem.

of CISOs expect to become a victim of ransomware in the next year.
(CISO Connect 2021 Ransomware in Focus)

of tech vendors have publicly visible critical ports.
(Black Kite Research Team, 2021 Data)

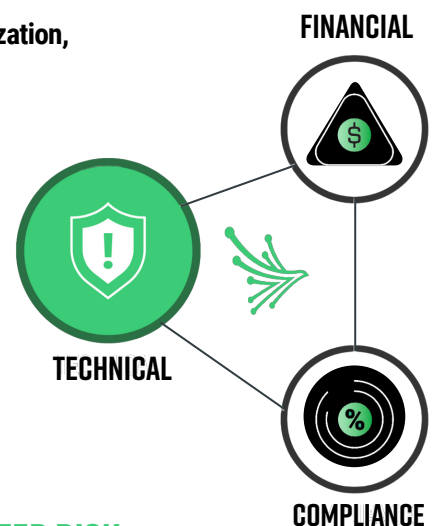

have at least one high-severity vulnerability due to out-of-date systems.
