## UNDERWRITE AND MANAGE PORTFOLIO RISK WITH CONFIDENCE

STANDARDS-BASED RISK INTELLIGENCE FOR CYBER INSURANCE UNDERWRITERS

With greater risk comes greater responsibility, but many carriers have struggled to adapt underwriting and portfolio review processes accordingly. Mundane, point-in-time risk assessments are outdated in terms of scalability, accuracy AND efficiency. Black Kite is the only cyber ratings tool that can deliver the level of visibility and consistency that underwriters desperately need because it's the only platform built specifically for third-party risk.

The FBI reports cybercrime has risen **300%** since the onset of Covid-19

Ransomware and funds transfer fraud account for **50%** of all known losses

Source: Coalition Inc, 2021

The average funds transfer loss incident increased by 179% in 2021

### PREVENT UNRECOGNIZED RANSOMWARE RISK WITH RATINGS BUILT FROM A HACKER'S PERSPECTIVE

Black Kite responded to the surge in ransomware incidents with the first and only ransomware indication tool, leveraging key indicators and machine learning to identify how likely an organization will experience an attack.

# TECHNICAL Ch between ad intelligence.

### INSTILL TRUST IN DECISIONS TODAY, ENSURE GROWTH TOMORROW

**Underwrite with confidence and consistency,** and avoid the back-and-forth between applicants and brokers thanks to Black Kite's transparent, standards-based intelligence.

**Achieve continuous risk visibility at scale with** automated third-party insights that provide a multidimensional view of any entity's attack surface 24/7/365.
