

# KICKSTART YOUR TPRM PROGRAM

in 5 easy steps

1

## Determine Your Vendor Scope

Identify which vendors in your database have access to your data or systems.

2

## Identify Specific Risk Scenarios

What would *actually* happen if one of your vendors got breached? Quantify it.

3

## Calculate the Financial Impact

Don't look at risk as purely a letter grade or score. Define it as \$ range of potential impact.

4

## Apply Your Resources To Your Highest Risk Vendor

Triage efforts to any crucial vendors holding the highest risk.

5

## Monitor for Changes

Continuously monitor your vendors for impactful changes in cyber health.
